

Summer Camp in Cambridge

From 6th to 19th July 2025, thirteen of our secondary students embarked on an exciting journey as they joined a two-week summer camp in Cambridge, United Kingdom. The camp provided a unique blend of academic and recreational activities, including subject-based classes and projects, special lectures, industry experiences, cultural excursions, city tours, and engaging society events.

Through this programme, we aim to help our students explore the wider world, experience new cultures and traditions, build independence, enhance social skills, and deepen their understanding in areas of personal interest.

We are so proud of our students and look forward to continuing to offer such enriching international opportunities in the years ahead.

Southbridge and the CCF - helping and serving together

Southbridge has had a long term caring and supportive relationship with the **Cambodian Children's Fund (CCF)**. Recently our team visited the CCF to deliver a donation of money raised by our community.

The money will be used to support at-risk students, their families, and the wider community. This initiative reflects Southbridge's ongoing commitment and the CCF's responsive approach to the daily challenges faced by those living in extreme poverty.

During the visit, we also toured the CCF's schools and their community housing for women. It was a humbling experience and we feel honoured to be connected with such an inspiring organisation.

Louisa Condorelli, Head of School

SIMOC 2025

Winning Medals in Singapore!

We are so very proud of our students that recently participated in the Singapore International Mathematics Olympiad Challenge, which was held in Singapore in July 2025.

26 of our talented students were awarded medals and came home with 5 Gold medals, 8 Silver medals, and 13 Bronze medals!

A big congratulations to our superstars and their families! Another example of academic excellence at SISC!

Academic Leadership Team

PISA Exam 2025 at Southbridge

We are honored to have been selected by the OECD and the Ministry of Education, Youth and Sport (MoEYS) as one of the sampling schools for PISA 2025 in Cambodia. The assessment was successfully conducted at SISC on June 25, 2025. We are delighted to share that the test day was a remarkable success, with 100% attendance from all selected students.

This achievement not only reflects the dedication and commitment of our students, teachers, and school community but also underscores our important role in contributing to global educational research. The data gathered through PISA will play a vital role in shaping evidence-based educational policies, enhancing teaching practices, and ultimately improving learning outcomes in Cambodia and beyond.

We take great pride in being part of this meaningful initiative and remain committed to supporting efforts that foster quality education for all.

Thol Pich, Khmer Programme Principal

SISC Strengthens Global Ties Through ASEAN-Australia BRIDGE Program

Southbridge International School Cambodia (SISC) proudly announces its participation in the prestigious ASEAN-Australia BRIDGE School Partnership Program. In June, I had the honour to travel to Australia to represent both SISC and Cambodia, as one of only 38 schools selected across ASEAN and Australia for this global initiative. The aim is to foster cross-cultural collaboration and educational exchange.

I visited our partner school, Clyde Creek Primary School in Victoria, Australia, where I was warmly welcomed by my partner teacher, Ms. Sarah Smith, and the school's leadership team. I observed innovative teaching practices, joined collaborative learning sessions, attended leadership meetings, and conducted a workshop for Australian educators—sharing insights on life, education, and culture in Cambodia and Southeast Asia.

I also visited the Victorian Academy of Teaching and Leadership, Monash University, John Monash Science School, and Cranbourne East Secondary College, gaining valuable ideas to bring back to SISC.

This ongoing partnership will soon lead to joint teacher-student activities that promote global citizenship, enrich learning, and create lasting impact across the school community. SISC extends its gratitude to the ASEAN-Australia Centre and Asialink Education for making this meaningful exchange possible.

Rozel Gonzales Del Rosario, Faculty Lead for Mathematics and Technology

Summer at SISC

This year we changed the structure of our Summer Programme offering families both an Activities Programme and an Academic Remedial Programme, in order to offer extra support to our students. Our Academic Programme included extra lessons in English, Mathematics, Science and Khmer, as well as extension workshops in STEAM. Our Activities Programme was full of fun with arts and crafts, dancing, music, ICT and coding, sports, swimming and more!

Some stand out activities included paper crafts and traditional dancing with our Khmer teachers; collage exploration with our Art Teacher; games that focused on critical thinking, role playing and problem-solving; and even Chinese art, singing and vocabulary-building!

Our SISC Summer School also made sure to provide a lot of creative and artistic opportunities for our children – through arts, crafting, textiles, weaving, music, dance, collage and colour work and floristry!

To wrap up our Summer School, we packed in some final dynamic activities. From Chinese calligraphy, to building propeller cars and rockets; and the endless sounds of the recorder through our hallways, as our older children learnt how to play this musical instrument.

We also took our students on field trips with each class being given the opportunity to extend their summer fun beyond the classroom! Our youngest children had fun socialising and using their imaginations in play centres, whilst our older children tested their physical fitness, as they bounced around on trampolines!

Our Summer School was a huge success, with smiles and laughter from our children until the very end!
